History

The history of Calibra dates back to 2001 when we decided to develop a new range of dry pet food in cooperation with veterinary experts. Our goal was to offer dog owners and breeders high-quality, nutritionally balanced food made from natural ingredients suitable even for animals suffering from food allergies and digestive problems. Development was completed in 2004 and we introduced Calibra's first granulated dry dog food on the market. Since 2004, we have been continuously expanding and innovating our product range.

About Us

Our company fully respects the individual nutritional needs of animals. Each recipe is carefully formulated based on the physiological requirements of each specific nutritional category. Every recipe is developed on the basis of previous experience and is continuously improved based on the latest information and nutritional requirements.

As we are fully aware of our responsibilities towards pets and all animals in general, it is our policy to not test our products on animals under laboratory conditions.

Our pet food is manufactured in strict accordance with the ISO 9001 standard, and the manufacturing process itself is monitored using the Hazard Analysis and Critical Control Points (HACCP) system.

Calibra Today

In recent years, the Calibra brand has become one of the most popular brands of commercial pet food on the Czech market. In 2015, we introduced a comprehensive range of veterinary diet dry pet food and earned a place among the few major manufacturers of clinical diets. In 2016, we expanded our range with an entirely new line of canned food for dogs and cats. At the same time, we also introduced an innovative superpremium line of dry pet food that includes grain free products.

Calibra Product Benefits:

- Premium and superpremium product lines
- Wide range of complete product lines for dogs and cats
- Developed in cooperation with veterinarians
- Timeless, high-quality, visually appealing packaging
- Leading products in their categories
- Our products contain no palm oil, soy, GMOs, chemical preservatives, or artificial colours
- Products fulfil ISO 9001 standards and are not tested on animals

Basic Ingredients

Chicken – a highly digestible source of low-fat protein that is well tolerated by the vast majority of dogs and cats

Lamb – an easily digestible meat with high nutritional values, suitable even for sensitive dogs

Salmon meat and oil – an excellent source of biologically valuable proteins, peptides, vitamins, and minerals, as well as the omega-3 unsaturated fatty acids (EPA, DHA) necessary for supporting the immune system and skin and coat quality, with anti-inflammatory effects

Duck – a very tasty hypoallergenic meat with a high protein and mineral content

Rice – a hypoallergenic and easily digested grain with a high carbohydrate content

In addition to the basic ingredients, individual recipes contain an ideal balance of vitamins and minerals, as well as a number of other highly beneficial additives:

Seaweed – an effective antioxidant and source of minerals; supports the immune system and reduces dental plaque and tartar

Fruit and Herb Blend (extracts of orange, rosemary, thyme, and parsley) – enhances palatability, reduces harmful bacteria, and supports the immune system, which in turn increases the body's disease resistance

Yucca Extract – reduces the amount of ammonia and other harmful gases in the intestines and the digestive system by up to 50%; also reduces flatulence

Beta-Glucans – stimulate and strengthen the immune system

Fructo-Oligosaccharides and Mannan-Oligosaccharides – prebiotics that support intestinal microflora, proper digestive tract function, and strengthen the immune system

Chondroprotectives – chondroitin sulphate protects against further damage to joint cartilage and glucosamine helps regenerate damaged joint cartilage

Organic Selenium – protects against free radicals and increases the body's resistance

Chelated Zinc – has a positive effect on skin and coat quality

Balanced Ratio of Calcium and Phosphorus – supports optimal growth and development of the skeletal system

Calibra Dog

The Calibra Dog Superpremium Line presents a new perspective on categorising recipes of the highest quality category. The line is divided into three subcategories by function - the division is simple, logical, and offers better orientation in the product line.

Calibra Dog Hypoallergenic – products covering a dog's entire lifecycle, from puppy to senior dog, divided into three size categories – small, medium, and large dog breeds

Calibra Dog Expert Nutrition – the Expert Nutrition line for specific nutritional requirements

Calibra Dog Grain Free – grain free recipes for the most common age and weight categories

Calibra Dog Hypoallergenic Adult Small Breed / Chicken & Rice

Complete dry food for small breed (1–10kg) adult dogs

Calibra Adult Small Chicken & Rice is a hypoallergenic grain free dry food for adult miniature and small dog breeds weighing between 1 and 10 kg. The tiny, tasty kibbles are adapted to ease the food's reception. This highly digestible food with chicken and a low grain content is suitable even for sensitive digestive systems. The higher calorie recipe and low feeding amounts suit the specific needs of smaller breeds.

- High chicken meat content, low grain content (only rice)
- Salmon oil as a source of omega-3 unsaturated fatty acids for healthy skin and coat
- Prebiotics, dried apples, beet pulp, and yucca extract promote good digestion without flatulence and digestive problems

Composition: chicken meal (22 %), dehydrated chicken (18 %), rice, brewer's rice, poultry fat (preserved with natural tocopherols), dried beet pulp, yeast, hydrolyzed chicken liver (2 %), salmon oil, sea algae, dehydrated apple, dehydrated spinach, mix of herbs & fruit (orange extract, rosemary, parsley, thyme - 300 mg/kg), prebiotics (mannan-oligosaccharides 120 mg/kg, β -glucans 100 mg/kg, fructo-oligosaccharides 70 mg/kg), yucca extract (80 mg/kg).

Calibra Dog Premium

Calibra Premium is a range of high-quality dry pet food containing a balanced proportion of nutrients, vitamins, minerals and trace elements so that they can fulfill all needs of a healthy dog's organism and support the correct function of the immune system. All formulas contain a high proportion of chicken meat and health-supporting additives. Every dog will appreciate the tastiness of the feed, which is superior due to the presence of hydrolyzed poultry liver. None of the Calibra Premium formulas contains any soya or preservatives.

Calibra Cat

Calibra Cat Superpremium is a line of hypoallergenic food with an emphasis on cats' natural eating habits. The entire line is carefully balanced nutritionally, easily digestible and has a high animal protein content. It is divided into three subcategories by function - the division is simple, logical, and offers better orientation in the product line.

Calibra Cat Hypoallergenic – products covering a cat's entire lifecycle, from kitten to senior cat

Calibra Cat Expert Nutrition – a product line for specific nutritional requirements

Calibra Cat Grain Free – special grain free recipes for adult cats

Deciding factors for the acceptability of the food by cats, who are notoriously picky eaters, are its palatability and aroma. We have focused on these attributes and believe that your finicky furry friends will show their appreciation for our efforts.

Complete dry food for kittens	KITTEN
Complete dry food for adult cats	ADULT
Complete dry food for senior cats and for body weight reduction or maintenance	SENIOR & LIGHT
